Waterproof Hands-free Dog Leash

Easy to Clean. Quick to Dry.

Total length	Width	Webbing
8.5 ft / 260 cm	**0.78 in / 2 cm**	**PVC-coated nylon**

Total length is measured with the leash fully extended. Usable distance to your dog varies with the mode, fit, and your and your dog's size.

Set up in 3 steps

1 Adjust the loop

With the leash slack, slide the D-ring adjuster to the desired loop size. Keep the strap flat and untwisted.

2 Clip the loop closed

Clip one end snap hook to the D-ring on its adjuster to form a hand loop or a loop to wear around your body.

3 Attach or use as a slip lead

Clip the free hook to a well-fitting collar or harness. For slip-lead use, clip it back to its D-ring to form a neck loop; slip it over your dog's head and adjust comfortably. Check that both hooks close fully.

Before every walk

Inspect the strap, stitching and hooks. Adjust only with slack. For slip-lead use, supervise closely; never jerk or overtighten the neck loop. Keep the loop slack.

Handles & more ways to use

Recommended dog weight

15-125 lb / 7-57 kg

With two dogs, consider their combined pull and your ability to keep both under control.

Find the right grip

End loop

At either end, clip the hook to its D-ring to form a handle. Adjust with slack and hold the soft-lined loop for everyday walks.

Center grip

The soft-lined section is in the middle of the leash. Hold it for two dogs, or use your free hand here for closer control.

Make a smaller loop

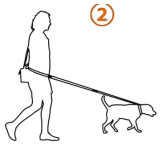

With the leash slack, slide the adjuster to form a smaller loop and shorten the working length.

Nine ways to use your leash

① Crossbody

Wear the loop diagonally across one shoulder and torso.

② Waist

Adjust the loop comfortably around your waist.

③ Handheld

Form an end loop; hold the soft-lined area.

④ Dual handles

Hold the end loop and center grip together.

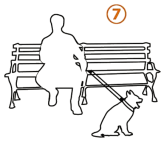

⑤ Fixed-point pause

Clip around a secure fixed point; stay beside your dog.

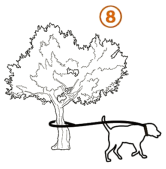

⑥ Slip lead

Form a neck loop; keep slack and supervise closely.

⑦ Seated pause

Use a stable bench; remain within your dog's reach.

⑧ Quick tie-out

Loop around a stable tree or post; clip closed.

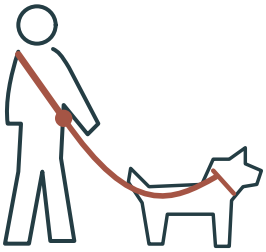

⑨ Two dogs

One hook per dog; hold the center grip securely.

Modes 5, 7 and 8: use a harness, stay within reach and supervise continuously. Never anchor a neck loop or leave a dog tied up unattended.

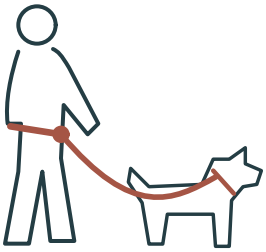

Choose your way to walk

01 Crossbody

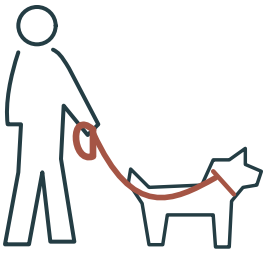

Make a large loop and wear it diagonally across one shoulder and your torso. Adjust for comfort, keeping the clasp accessible. Attach the free hook to your dog.

02 Waist

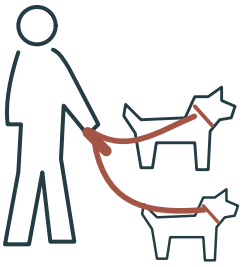

Wrap the loop around your waist and clip it to the D-ring. Adjust comfortably without tightening against your body. Attach the free hook to your dog.

03 Handheld

Clip one hook back to its D-ring to form a handle. Adjust with slack and hold the soft-lined area securely, without wrapping the strap around your hand.

04 Two dogs

Open both end loops. Attach one hook to each dog's collar or harness. Hold the soft-lined center grip securely. Use only if you can control both dogs together.

For closer control

Hold the soft-lined center grip to shorten the distance when safe. Change modes or adjust only with slack.

Walk safely

- Adult supervision required. Never leave a dog tied up unattended.
- Use hands-free modes only if you can manage sudden pulls. Hold the leash near traffic or crowds.
- Do not wrap around your hand or neck. Keep the leash clear of legs, paws and wheels.
- Not a chew toy, vehicle restraint, or equipment for climbing or towing.
- Replace if the coating is cut, the core is exposed, stitching is damaged, or a hook fails to close fully.

Clean and care

Wash

Use water and mild soap.

Rinse and wipe

Rinse clean; wipe the metal hardware.

Air-dry

Dry before storing. Avoid bleach, solvents and high heat.
